

Content Management System Blog

In PHP and MySQL

Here I will be discussing about two section mainly. User section and admin section and we will have a small overview about our database.

User Section

Home Page:

This is the default home page with login and search feature. Blog Search and login corresponds to search.php and login.php .

Post Specific Page:

PHP zend engine

by Nazish Akhtar

© 2018-01-29

As soon as zend engine was added to php it became really awesome.

Subit Query

Admin Section

Admin Dashboard:

Admin dashboard gives us brief overview of total number of posts, comments, users and categories. With the help of Google Charts.

Profile Page:

The Profile Page allows users to manage their personal information. It includes a sidebar with navigation links for Dashboard, Posts, Categories, Users, Comments, and Profile. The main content area displays the 'Profile' section with fields for First Name, Last Name, User Role, Username, Password, and Email. An 'Update Profile' button is located at the bottom of the form.

Field	Value
First Name	Wendy
Last Name	Scarlet
User Role	Select Options
Username	wendy
Password	
Email	wendy@fairly.com

Displays user/admin information and you can update your information from here.

Comments Page:

22	ed	adssadd	d@gmail.com	approved	Edwin's PHP course is awesome	2018-03-18	Approve	Unapprove	Delete

This page lists all the comments and admin can approve/disapprove or delete comments from here.

Users Page:

From users page we can check two things.
a) List of existing users and admins. As shown below.

CMS Admin Users Online : 1 Home Wendy

Posts Page:

From post page also we can check two things.

a) You can view all the post from there. You also have several options such as:

- 1) Publish
 - 2) Draft
 - 3) Delete
 - 4) Clone
- for multiple/single posts.
